

KNOW YOUR APPLICATION

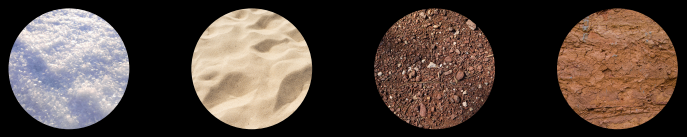

- **TRACK KNOWLEDGE**

C-LUG

Whether you need to drive on or off road, the C-Lug pattern is the most versatile tread for any terrain. It works well on asphalt, concrete, dirt, gravel, sand, and even turf.

ZIG-ZAG

If you need a tough and reliable tread for snow and mud, the Zig-Zag pattern is the one for you. It also handles dirt, sand, and clay with ease.

BLOCK

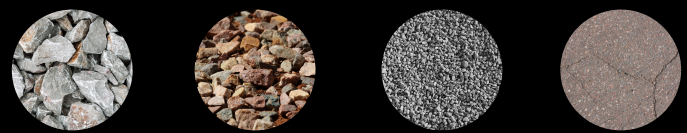

For a track that can handle any surface, the Block pattern is the ideal choice. It works well on asphalt, concrete, gravel, and even turf. It's also a popular option among OEMs.

BOLT

For a smooth and durable ride on any hard surface, the Lightning Bolt Pattern is the perfect track. It provides steady traction on asphalt, pavement, concrete, and even turf.

SOLID TIRES

Solid tires are recommended for any applications that have sharp aggregate or rock. These applications will severely deteriorate the lifespan of a rubber track.
